Directions {29 - 31}: Study the following information carefully and answer the questions given below:

Poverty measurement is an unsettled issue, both conceptually and methodologically- Since poverty is a process as well as an outcome; many come out of it while Cithers may be failing into it. The net effect of these two parallel processes is a proportion commonly identified as the 'head count ratio', but these ratios hide the fundamental dynamism that characterises poverty in practice. The most recent poverty re-estimates by an expert group has also missed the crucial dynamism. In a study conducted on 13,000 households which represented the entire country in 1993-94 and again on 2004-05, it was found that In the ten-year period 18.2% rural population moved out of poverty whereas another 22.1% fell Into It over this period. This net increase of about four percentage points was seen to have a considerable variation across states and regions.

29. Which of the following is a conclusion which can be drawn from the facts stated in the above paragraph?

(1) Accurate estimates of number of people living below poverty line in India is possible to be made.
(2) Many expert groups In India are not interested to measure poverty objectively.
(3) Process of poverty measurement needs to take into account various factors to tackle its dynamic nature,
(4) People living below poverty line remain in that position for a very long time.
(5) None of these

30. Which of the following is an assumption which is implicit in the facts stated in the above paragraph?
(1) It may not be possible to have an accurate poverty measurement in India.
(2) Level of poverty in India is static over the years.
(3) Researchers avoid making conclusions on poverty measurement data in India.
(4) Government of India has a mechanism to measure level of poverty effectively and accurately.
(5) None of these

31. Which of the following is an inference which can be made from the facts stated in the above paragraph?
[1] Poverty measurement tools in India are outdated
[2] Increase in number of persons falling into poverty varies considerably across the country over a period of time.
[4] People living in rural areas are more susceptible to fall into poverty over the time
[5] None of these.

Lumbini is a beautiful place in the southern part of Nepal. About 2,500 years ago, a baby boy was born to the king and queen. The baby was named Siddharth. His mother, died when he was five days old. The baby boy grew into a handsome prince. His father tried to keep him happy. The little prince had everything he needed — fine clothes, the best food and good toys. But he was not interested in them. He wanted to be alone and was always found in deep thought. Later, he was married to a beautiful princess. She was called Yashodhara. They had a son and named him Rahul. The king hoped that Siddharth would become a great ruler.

One day Siddharth was driving through the street in his chariot. He saw an old man and then a sick man. The old man could hardly walk. The sick man groaned in pain. Then he saw some people carrying a dead body, others were weeping and weeping at the loss of a dear one. Siddharth was very upset to see so much suffering and unhappiness. He was shocked. Then he saw an entirely different sight. A man in yellow robes was walking along the street. There was no trace of sadness on his radiant face, instead It shone with peace. He was a monk who had given up the world to escape the misery of life.

Siddharth wanted to find out why there was so much suffering in the world. He wanted to find out how men could be free of misery. He could find neither peace nor happiness in the life he was leading at the palace. One night Siddharth left his home, his wife and his little son. He went into the forest. He wanted to search for a way out of suffering and sorrow for all mankind. He meditated and got enlightenment. He became Lord Buddha, the enlightened one. Truth was revealed to him and he learnt all the secrets of life and the world.

He found out that the world was full of sorrow and unhappiness. The reason for it was greed and selfishness. To be free from suffering, we must be free from greed and desire. Desire is the root cause of all human suffering. He advocated the Middle Path and asked his followers to avoid the two extremes.
